POLICY ON MAJOR SCHOOL CHANGE

A policy on the distribution of educational services

Guided by its vision to achieve excellence, the Lester B. Pearson School Board (LBPSB) aims for the success of all its students, taking into account its community, its mandate and its resources. In order to ensure fair and equitable management of these resources and based on the principles established in the Education Act, LBPSB reviews regularly the continued operations of its schools and centres in the context of a changing environment.

Each year, as part of its functions, the School Board must establish a three-year plan for the allocation and destination of its buildings (section 211 of the Education Act). This gives the opportunity to the School Board to review and plan the distribution of the educational services it provides throughout all of its schools and centres. As part of this process, section 212 of the Education Act stipulates that the School Board must follow a formal consultation process when it considers closing a school or implementing changes to the level of instruction¹ provided by a school.

Depending on the change considered, the consultation delay may vary. The Education Act requires a three-month process if the School Board considers implementing changes to the level of instruction provided by a school (refer to Schedule A) and a one-year process if the School Board considers closing a school (refer to Schedule B). These changes may lead to the amendment or revocation of the Deed of Establishment of a school or to changes to the Board's Three-Year Plan of Allocation and Destination of its Immovables.

The decision-making process begins with the primary objective of delivering quality educational services to all youth and adults within the system. To guide its decisions, the School Board takes into consideration factors such as:-

- student enrollment patterns and projections;
- program rationalization;
- population distribution;
- operating costs;
- staffing considerations;
- attendance zones and transportation zones;
- the optimal capacity and the condition of the facilities.

This list of factors is neither prescriptive nor exhaustive. They are presented here merely as examples.

¹ Including changes to cycles or part of cycles of the level of instruction provided by a school as well as the cessation of kindergarten services in a school. Definitions at Schedule C.
