19,522 Students - Youth
4,425 Students - Continuing Education
37 Centres
13 Elementary Schools
10 Secondary Schools
How do we measure and capture the success of the Lester B. Pearson School Board - an organization where diversity is celebrated, inclusion is imbedded, and the individual is celebrated alongside the community?

Our vision of success is a holistic one; recognizing the inter-connectedness of our core values: Achievement, Wellness, and Engagement. Our students aspire to achieve and exceed their academic objectives, live well, and be fully present and engaged citizens. With the guidance of exceptional teachers, staff, administrators, community partners, and families, these ambitions become reality.

The 2017-2018 school year saw gains and significant progress in achievement and graduation/qualification rates, student and staff wellness initiatives, and learning frameworks/pedagogical partnerships.

The LBPSB has one of the highest graduation rates in the five year cohort for the last 5 years in the public schools of Quebec; while serving a diverse population that has access to a wide range of innovative education pathways. We celebrate our diversity as a reflection of the communities we serve.
Achievements — The Lester B. Pearson School Board is committed to nurturing students’ achievement through innovative pedagogical practices, measures, and interventions targeted to the individual’s unique needs and interests. Teachers, administrators, and staff diligently research and carefully consider approaches to maximizing student achievement across all grade levels and subject areas. While maintaining one of the highest achievement levels among Quebec school boards, LBPSB has also seen growth and improvement in Secondary IV & V core subjects. As students challenge themselves to achieve and exceed their goals; LBPSB teachers, administrators, and staff are equally committed to establishing a culture of success.

Wellness — Inherent to student success is an overall feeling of wellness within and beyond the walls of the school. LBPSB has taken a proactive approach in establishing a culture of wellness for all its stakeholders. Be it physical, emotional, or mental wellness; students and staff are encouraged to create wellness activities and initiatives that fit their needs. Our philosophy is that living well is contagious. By ensuring the wellness of our youngest students to our senior staff, the LBPSB and the community at large truly benefits.

At the elementary level, the My Daycare is Physically Active initiative has grown from two schools and thirty-one trained employees in 2015 to fifteen schools and nearly two-hundred fifty employees participating in training programs. This two year program consists of six two-hour workshops focusing on the importance of daily physical activity for students and strategies for effectively organizing, animating and supervising physical activities during daycare hours. Additionally, eleven of our elementary schools were active participants in the À l’école on bouge au cube! initiative a MEES initiative developed in collaboration with Le Grand Défi Pierre Lavoie.
Engagement — LBPSB has joined the ground-breaking pedagogical framework known as *Deep Learning*. Anchored by the ‘6 C’s’, we recognize the importance of constant **Communication**, challenge ourselves to employ **Critical Thinking** and strengthen **Creativity**, encourage active **Citizenship** and a strong sense of **Character**; all while **Collaborating** with teachers and staff. Our approach to Deep Learning is one of flexibility; whereby schools and classrooms are encouraged to put their unique spin on the framework. LBPSB’s long-term investment in the Deep Learning framework allows our students to engage with all aspects of the self and the community at the highest level.

Professional Partnerships
Youth, Adult/Vocational

LBPSB is proud of its rich partnerships and relationships with industry leaders and community organizations. Encompassing a diverse range of competencies and disciplines, these partnerships offer students real-world applications to their learning; while exposing them to professional opportunities that match their interests. In keeping with the Deep Learning framework, LBPSB’s partnerships are rooted in innovative pedagogy and are aligned with students’ interests. Both the Youth and Adult/Vocational sectors are committed to building new partnerships and strengthening existing ones.
